SUMMARY

Computer Science undergraduate with hands-on experience across full-stack web development (MERN), desktop/database applications (C#, SQL Server), data structures, and networking (Cisco Packet Tracer). Seeking a software development role to apply and grow these skills in a production environment.

EDUCATION

Bachelor of Science in Computer Science

2024 – 2028

Air University, Multan, Pakistan

- CGPA: 3.50 / 4.00
- Relevant Coursework: Data Structures, Database Systems, Computer Networks, Digital Logic Design, Information Security

PROJECTS

Affinity Hub — Full-Stack Social Media Platform

2026

MERN Stack (MongoDB, Express.js, React, Node.js), REST APIs, Cloudinary

- Built and deployed a full-stack social media platform with authentication, profiles, posts, stories, likes, and comments
- Developed secure JWT authentication with Google OAuth, email OTP verification, and role-based authorization
- Designed scalable REST APIs using Node.js, Express.js, MongoDB, and Mongoose; integrated Cloudinary, Brevo API, and Cloudflare Turnstile for storage, email, and security
- Built a responsive React + Vite + Tailwind CSS frontend with dark/light themes and an admin dashboard for moderation (reports, bans, suspensions); deployed via Vercel and Render

FiberLink Regional ISP Network

2026

Computer Networks — Cisco Packet Tracer

- Designed and implemented a multi-city ISP network with redundant backbone routing, serving residential, corporate, and hospital customer segments
- Configured VLSM/VLAN addressing, OSPF routing, DHCP/DNS/NAT, and ACL-based security across 20+ subnets; verified connectivity and access control through systematic testing

Real Estate Management System

2025

C#, WPF, ASP.NET, SQL Server

- Developed desktop and web-based modules for managing plots, projects, and customers, with authentication, full CRUD operations, and structured XAML/ASP.NET interfaces backed by SQL Server

Flight Management System

2025

C#, Windows Forms, SQL Server

- Designed and developed a database-driven Flight Management System with role-based authentication for Admin and Employee modules
- Implemented SQL Server backend using stored procedures, triggers, and relational schema design; optimized queries and enforced business logic with constraints

Search Engine Auto-Complete & Web Crawler Simulator

2025

C++, AVL Tree, Trie, Heap, Queue, Stack

- Developed a search engine simulation integrating a BFS-based web crawler with AVL tree-based keyword indexing
- Designed Trie-based prefix search for real-time auto-complete suggestions, and a Max Heap-based ranking system for relevance scoring

EXPERIENCE

Head of Community Administration

07/2021 – 09/2024

Discord Communities — Remote

- Managed and moderated online communities of 2,500+ and 300+ members, overseeing daily operations, engagement, conflict resolution, and process improvements that boosted retention

SKILLS & CERTIFICATIONS

Languages & Web: C#, SQL, JavaScript, C++, HTML, CSS, Bootstrap, Tailwind CSS, React, Vite, Node.js, Express.js, REST APIs

Frameworks & Databases: ASP.NET, WPF, SQL Server, MongoDB (Mongoose)

Tools & Platforms: Git, GitHub, Windows, Cisco Packet Tracer, Vercel, Render

Certifications — Microsoft: Relational DB Design & Advanced Querying, SQL Foundations • Meta: DB Structures & Management with SQL Server, Version Control • Google: Foundations of Project Management
